DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Kanatake et al (U.S.Pat. 6,606,739).

With respect to claim 1, Kanatake discloses a dynamic mask module (38) for transferring a mask pattern to a photo-resist on a substrate and comprising all structures set forth in the instant claim such as: a microcomputer (36); a digital light processing optical projection (col.3, lines 33-35) placed over the substrate (42) and electrically connected to the microcomputer system, wherein the microcomputer system transmits an image signal of the mask pattern to the digital light processing optical projector for generating pluralities of opaque regions and transparent regions and outputting the mask pattern and a light source (32) disposed over the digital light processing optical projector, light of the light source projecting on the opaque regions and transparent regions for transferring the mask pattern to the photo-resist.

As to claim 2, Kanatake further teaches a focusing lens (40) positioned between the light processing optical projector and the substrate to minify or magnify the mask pattern.

Prior Art Made of Record

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Mei et al (U.S.Pat. 6,537,738) and Mei et al (U.S.Pat. 6,425,669) disclose digital lithography systems having dynamic mask modules, each of which comprises all features as recited in the instant claims of the present invention.

Response to Amendment/Arguments

4. Applicant's amendment filed May 13, 2005 has been entered. Claims 1-2 have been amended. Applicant's arguments with respect to prior art rejection have been carefully considered but have been traversed in view of new ground of rejection as set forth above.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2851

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
